

CAAR GROUP Case History

Francesco Ellena
President

Timeline

where are we doing what

Torino (TO) • Italy

Product & Process Engineering

- Product Development
- Dies design
- BIW process and fixture design
- General Assembly
- Mechanical machining & assembly
- Process Simulations

Torino (TO) • Italy

Electronic Engineering

- On-board Electronic Systems
 - Design
 - Development
 - Integration
 - Validation
- Embedded Software for Electronic Control Units
- Testing

Belo Horizonte • Brasil

Product & Process Engineering

- Product Development
- CAE Simulation
- Manufacturing Engineering
- Fixture Design

Torino (TO) • Italy

R&D

- Research organization
- UNI EN ISO 9001: 2000 certified
- W3C member

Corato (BA) • Italy

R&D & Innovation

- R&D Center
- Innovation
- Focal Point for South Italy activities

Bolzano (BZ) • Italy

Mechanical Engineering

- Production, auxiliary and maintenance tools design and MNFTG
- Testing equipment design and MNFTG
- Pneumo-Hydraulic systems design and manufacturing
- Electrical systems design and MNFTG

Kragujevac • Serbia

EE Engineering & MNFG Engineering

- Artificial intelligence
- Automotive, aerospace and railway industry consultancy
- Research and development

>350 people from 12 different countries

PRODUCT DEVELOPMENT

PROCESS ENGINEERING

MECHANICAL PROCESS
ENGINEERING

ELECTRONIC ENGINEERING

Electronic Devices Integration in E/E Arch.
Implementation Spec's
Vehicle Function Definition
Design and Technical Reviews
Formal Requirement Definition & Management

Test Plan and Test Cases Definition
On-Bench Validation
In-Vehicle Testing
Integration Testing
Back and System Validation
Cyber Security Validation

E-Powertrain Systems

BMS Design
Cells and Module Characterization
Battery Pack Design
Inverter Design
DFM (Design for Manufacturing)
Product Validation
Prototypes management
ME for Assembly Equipment and Process
End-Of-Line (EOL) testing procedures

Artificial Intelligence Algorithms

Battery Management System Algorithms
Real SOC determination
SOH determination
Rebalancing of active cells
ADAS Systems Algorithms
Face recognize
Gesture recognize

10 people to 30 in 2 years

THANK YOU!
